

Kareena to dance at a wedding?

Mumbai, February 02: Last week, Kareena Kapoor sizzled on stage at two award functions after missing the first three shows of the awards season. "I was away on a vacation with Saif (beau Saif Ali Khan) so I missed them. But once I came back from Europe, I was game for some live performances. I like to dance and make some money," she says with a smile.

At the Apsara Awards, Kareena flagged off her act with Akon's Chamak challo from RA.One (2011), even retaining the sexy red sari and the nose-ring.

The sari changed colours, from red to black to gold, but the nose-ring stayed in place as the Bollywood star moved into Ringa ringa ree, the Telugu song from Allu Arjun's Arya 2 (2009) that had inspired the Salman Khan-Asin's Ready (2011) chartbuster, Dhinka chika.

She then got dirty with Nakka mukka from Nakul-Sunanina Tamil hit, Kadhalil Vizhunthen (2008), before rounding up the evening's showpiece with the song of 2011, Dhanush's Kolaveri di, from his upcoming Tamil movie, 3.

Quiz her on whether the masala medley is a prelude to a movie down south and Kareena laughs, "Oh, I have been offered several movies down south, but never thought about doing one. With all the Hindi movies I am doing, I barely have time for friends and family. The last year was so hectic, that the break in Switzerland was well deserved for both Saif and me. The reason we zeroed in on two Tamil and one Telugu song was because they are quite the rage today. It was the first time a female actor was dancing to Kolaveri di.. and I really enjoyed myself."

So, where will she head to next? The IIFA Awards?

"Well, they haven't approached me yet and it would depend on whether I have dates to spare. It already promises to be a hectic year. I've only shot for Heroine for 11 days and have another 80 to go," she sighs, adding brightly, "It's always fun being on stage in front of the film fraternity. But I would never dance at weddings."
